

Waterfit is awarded with **TOP-grade 1.9 GOOD to VERY GOOD** from the renowned water testing analysis Institute of Hagalis, Germany and additional certificates please see below.

## 1. Executive summary

- \* We demonstrably have a **proven higher oxygen content** in the water, the metabolism is stimulated positively, the users feel more active and fresh.
- \* Our "Waterfit" products **mean for buildings value preservation and appreciation.**
- \* **Cost and time savings** for the cleaning chemistry up to approx. 30% or more possible as well as faster and thus cheaper room, building, house, apartment cleaning etc.
- \* **Without follow-up costs, without maintenance, without chemicals, without electricity.**
- \* **Some references:** architects, building companies, technical offices, property management companies, governmental authorities, doctors, pharmacies, farms, food, paper, installers, single family homes, apartments etc. recommend from there **Waterfit**:

**„the physical-ecological, chemical free, following costs free and maintenance free construction method of Waterfit lies fully in the trend of the time“.**

## 2. More detailed description

*What is the result of Waterfit generally?*

A double benefit: **wellness** and **savings**

**How does Waterfit work?**

- **Activation of water and water recovery** by turbulence technology leads to **wellness** at home or in the company.
- **Minimization of calcification** by converting calcite in aragonite by using magnetic technology leads to savings.
- **Improved resistance to contamination** through the use of high-quality, partly silver plated stainless steel materials.
- **Without energy costs, without maintenance costs, without chemical additives, without any follow-up costs, working on a purely physical basis only.**

**Waterfit saves the nature much chemistry.** Humans consists of about 60-70% of water, our brain of approx. 85%.

*What means Waterfit for the user in detail?*

The **proven improved water quality both in terms of biological as well as technical** means: evaluation by means of chemical and physical parameters and crystal analysis by the renowned water testing analysis Institute of Hagalis, Germany:

**TOP-grade: 1.9** i.e. after the school grading scale: **GOOD TO VERY GOOD:**

- **Approaching the quality of spring water**
- **Increased energy balance** of water.
- **Increased oxygen levels** in the water.
- **Positive stimulation** of the metabolism.
- **Refreshment effect and improved ability to concentrate.**
- **Water is drunk again with pleasure**, it tastes better and leads to potential savings in costs and time: mineral water or soft drinks can be reduced or replaced.
- **Water mixtures** (e.g. coffee, tea, fruit juice, wine, bread, pastries, dishes etc) taste better. Companies (e.g. (wellness)hotels, restaurants etc.) will sell more because it tastes better to the people.
- **More enjoyable water experience** while washing, showering, bathing, swimming etc.
- **Minimization of calcification** in pipes and appliances leads to longer lifetimes of e.g. water heater, washing machine, dishwasher, coffee maker, kettle, egg cooker, etc. and thus to reductions in service, cleaning, repairs and new equipment costs.
- **Visible deposits on faucets** etc. are easier and faster to remove: savings in cleaning agents and time set up.
- **Faster cleaning** in house, apartment, kitchen and bath: cleaning agents and the time savings.
- **Savings in washing and cleaning products** in household, commercial, catering, hotel, industry, etc., as well as
- **reduced additives of chlorine in swimming pools:** swimming is more attractive and comfortable on the skin, no red eyes etc. and leads, therefore, to the **spa experience**.

Also, our **users report** that after installation of **Waterfit**:

- **slim line (well-being and weight loss)** will be promoted.
- the **use of shampoos results in a fluffier, more beautiful, more attractive hairstyle.**
- the **use of creams can be reduced and thus leads to savings** which can be spent elsewhere certainly more meaningful e.g. shopping, holidays etc.
- **pets** and animals prefer to drink our **Waterfit** water (e.g. dogs, cats, horses etc.).
- the **plants** are stronger and live longer.
- **lawns and greens** are stronger and greener.
- **fertilizer** can be reduced.
- **vegetables** taste better and as tomatoes are juicy and redder.
- **far less pest infestation** as usual.

Furthermore, our **Waterfit** products have **more analyses**:

- University of Natural Resources and Life Sciences, Vienna, Austria/Europe
- OFI Austrian Research Institute, Vienna, Austria/Europe
- TUV Austria (technical supervision) tests, Vienna, Austria/Europe
- TUV Austria controlled production, Vienna, Austria/Europe

**Architects, building companies, technical offices, property management companies, governmental authorities, doctors, pharmacies, farms, food, paper, installers, single family homes, apartments etc. recommend from there Waterfit:**

**„the physical-ecological, chemical free, following costs free and maintenance free construction method of Waterfit lies fully in the trend of the time“.**

On our **homepage** <http://www.waterfit.at/wasserbelebung/en/home.php> you can find also some **Waterfit - references and testimonials** <http://www.waterfit.at/wasserbelebung/en/references.php> and **further information** (e.g. the loss of the human need of water drinking with increasing age, the consequences of it and what you can do about it etc.).

Best regards
